

AbdAlRahman Hanafi

abdualrahman.hanafi@gmail.com | +963 930 300 069 | Damascus, Syria

Professional Summary

Front-End Developer specializing in React.js with solid experience building responsive, high-performance web applications. Skilled in modern JavaScript (ES6+), component-based architecture, and state management, with strong practice integrating and optimizing RESTful APIs. Experienced in software engineering and delivering complete features from design to deployment, with additional skills in Flutter for cross-platform development. Knowledgeable in system analysis, networking fundamentals, Linux systems and web-security basics, supported by ongoing preparation for the CompTIA Network+ certification

Technical Skills

- **Front-End:** React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Design
- **React Ecosystem:** React Hooks, Context API / Redux (state management patterns), React Router
- **Programming:** Dart, Java, C++, OOP principles
- **APIs & Tools:** RESTful APIs, Git (GitHub/GitLab), Agile/Scrum workflows, debugging & profiling
- **Cross-Platform:** Flutter & Dart for mobile applications
- **System Analysis:** Requirements gathering, functional decomposition, practical workflow modeling
- **Networking:** Basic OSI/TCP-IP concepts
- **Security & Cryptography:** Basics of encryption, hashing, secure data handling
- **Web Security:** Practical understanding of XSS, CSRF, SQL Injection and defensive techniques
- **Linux:** Basic command-line usage, filesystem navigation, package management and general system operations
- **Other:** Component-driven development, problem solving, code review and testing practices

Projects

Schools Buffets Management System – Owner/Admin Web Application

Sep 2025 | GitLab: <https://gitlab.com/thedarkhawk9177-group/buffet-management>

- Developed a full-stack web platform to manage buffets across multiple schools.
- Implemented CRUD operations for buffets, workers, suppliers, categories, and inventory.
- Designed dashboards tracking profits, losses, transactions, complaints, and sales.
- Integrated real-time notifications and automated report generation for sales and inventory.

Dashboard Complaints System – Admin & Employee Web Application

Dec 2025 | GitHub: <https://github.com/abd-alrahan/dashboard-complaints-system>

- Built a responsive complaints management system with modular structure for scalability.
- Implemented role-based access for Admin and Employee with clear permission boundaries.
- Designed admin dashboards to monitor complaint lifecycle and system activities.
- Created citizen-facing interaction features to capture feedback and improve resolution rates.

The React Quiz

Oct 2025 | GitHub: <https://github.com/abd-alrahan/react-quiz>

- Developed a quiz web app with multiple difficulty levels, timers, and score tracking.
- Implemented progress indicators, result summary, and UX feedback animations.

Classy Weather

Jul 2025 | GitHub: <https://github.com/abd-alrahan/classy-weather>

- Built a weather app with location and flag detection and a 7-day forecast display.
- Handled partial city matches and implemented instant search feedback.

usePopcorn

Jul 2025 | GitHub: <https://github.com/abd-alrahan/usepopcorn>

- Created a movie search and rating web app with CRUD operations for watched movies.
- Displayed movie details and calculated average statistics for user tracking.

Eat-N-Split

Jun 2025 | GitHub: <https://github.com/abd-alrahan/eat-n-split>

- Developed a bill-splitting app to track balances and owed amounts with clear visual cues.
- Implemented friend management with real-time updates and balance calculations.

Home Workout System – Trainer Admin Application

Jun 2024 | GitHub: <https://github.com/abd-alrahan/adminfitness>

- Built an admin panel to manage exercises, diets, and fitness tips for users.
- Implemented user management features, including removal of redundant accounts.

Home Workout System – Trainee Mobile Application

Jul 2024 | GitHub: <https://github.com/abd-alrahan/myfitness>

- Developed a mobile app for home workouts and fitness tracking.
- Enabled trainees to follow exercise plans, diets, and trainer-provided tips.

Education

Bachelor of Science in Informatics Engineering (Software Engineering)

Damascus University | Expected 2026

Courses & Certifications

- **React JS Development** – Udemy (Completed Jul 2025)
- **Flutter & Dart Development** – Udemy (Completed May 2024)
- **CompTIA Network+** – Self-Study (Expected Mar 2026)

Training

Web Development Intern – Al-Mounkezz Company

Damascus, Syria | Nov 2024 – Feb 2025 (3 months)

- Assisted in developing web features using HTML, CSS, and JavaScript.
- Collaborated with senior developers on bug fixes, testing, and feature enhancements.

Languages

- English – B2 (Upper Intermediate)
- Arabic – Native
