

AbdAlRahman Hanafi

abdualrahman.hanafi@gmail.com | +963 930 300 069 | Damascus, Syria

Professional Summary

Motivated Software Engineer with multi-domain expertise spanning web/mobile development, system analysis, networking, and security fundamentals. Proven track record of delivering full-lifecycle software solutions using React.js, Flutter, and RESTful APIs. Skilled in problem-solving, requirements analysis, and cross-functional collaboration. Currently pursuing CompTIA Network+ certification to deepen networking and security knowledge.

Technical Skills

- **Programming:** JavaScript (ES6+), Dart, Java, C++, OOP principles
- **Web Development:** HTML5, CSS3, Responsive Design, RESTful APIs
- **Front-End Frameworks:** React.js, Hooks, Context API / Redux, React Router
- **Mobile Development:** Flutter & Dart
- **Tools & Workflows:** RESTful APIs, Git (GitHub/GitLab), Agile/Scrum workflows, debugging & profiling
- **System Analysis:** Requirements gathering, workflow modeling, functional decomposition
- **Networking:** OSI/TCP-IP fundamentals, Network+ (in progress)
- **Security & Cryptography:** Basics of encryption, hashing, secure data handling
- **Web Security:** Practical understanding of XSS, CSRF, SQL Injection and defensive techniques
- **Linux:** Command line, package management, system operations
- **Soft Skills:** Communication, teamwork, problem-solving, documentation, code review

Professional Experience

Web Development Intern – Al-Mounkezz Company

Damascus, Syria | Nov 2024 – Feb 2025 (3 months)

- Assisted in developing web features using HTML, CSS, and JavaScript.
- Participated in bug fixing, testing, and Agile workflows.

Projects

Schools Buffets Management System – Admin Web Application

Sep 2025 | GitLab: <https://gitlab.com/thedarkhawk9177-group/buffet-management>

- Developed a multi-module web platform for managing buffets, workers, inventory and financial reporting.
- Designed dashboards for profits, losses, transactions, and complaints.
- Implemented real-time notifications and automated monthly reports.
- Contributed to system modeling and workflow design.

Dashboard Complaints System –Admin & Employee Web Application

Dec 2025 | GitHub: <https://github.com/abd-alrahan/dashboard-complaints-system>

- Created a complaints management system with role-based access for Admin and Employees.
- Designed complaint lifecycle tracking, user activity logs, and citizen feedback interface.
- Focused on modularity, scalability, and clean architecture.

Home Workout System – Trainer/Admin Platform

Jun 2024 | GitHub: <https://github.com/abd-alrahan/adminfitness>

- Designed an admin dashboard for exercises, diets, and fitness plans.
- Added user management tools and automated cleanup of inactive accounts.

Home Workout System – Trainee Mobile App

Jul 2024 | GitHub: <https://github.com/abd-alrahan/myfitness>

- Developed a Flutter mobile app allowing trainees to follow exercise and diet plans.

Education

Bachelor of Science in Informatics Engineering (Software Engineering)

Damascus University | Expected 2026

Courses & Certifications

- **React JS Development** – Udemy (Completed Jul 2025)
- **Flutter & Dart Development** – Udemy (Completed May 2024)
- **CompTIA Network+** – Self-Study (Expected Jun 2026)

Languages

- English – B2 (Upper Intermediate)
- Arabic – Native
