

AbdAlRahman Hanafi

React.js Developer

abdualrahman.hanafi@gmail.com | +963 930 300 069 | Damascus, Midan (Syria)

PROFESSIONAL SUMMARY

React.js Developer with foundational experience in building responsive and interactive web applications. Skilled in UI development, state management, and integrating RESTful APIs. Strong knowledge of JavaScript (ES6+), React.js, and modern front-end practices with performance profiling. Experienced in delivering projects from concept to deployment, with exposure to Flutter and cross-platform development. Eager to contribute to collaborative teams and expand expertise in scalable front-end solutions and development.

PROJECTS

Schools Buffets Management System

9/2025

Owner-admin Web Application

GitLab: <https://gitlab.com/thedarkhawk9177-group/buffet-management>

- Enabling comprehensive control over all system functionalities for all buffets.
- Adding new buffets, new items, new sandwiches, new workers, new categories and suppliers with the related detailed information for each one and the ability to delete any of these.
- Know exactly what happen in every buffet for customer orders, worker orders, customer complaints, inventory, cash, daily total sales, spoilage products and loss, profits and adding transactions for new buffet's orders and anything related to this buffet (like electricity bills, ...etc) with the ability to see details for every part and track exactly what happened for buffet's cash.
- Track the profits and losses for every buffet in dashboard overview to see how this buffet will go and automatically produce reports for these information about this buffet or all buffets.
- Automatically recive notifications when worker make new order for specific buffet, when customer make new complaint for specific buffet to know in-time what happened and try to track them immediately.

Schools Buffets Management System

9/2025

Worker-user Mobile Application

GitLab: <https://gitlab.com/thedarkhawk9177-group/buffetmanagementsystem>

- Only specific workers who are added by the owner (admin) to specific buffet (there is no register).
- Enabling some control over all system functionalities for specific buffet.
- Adding new products that received from the owner to inventory and these items are already added by the owner.
- Stocktaking to know everytime what is found in the inventory for this buffet and that helps for top selling products, sales, spoilage products, profits that help the owner to track this buffet.
- Making sandwiches, adding them to inventory and automatically calculate exactly what is the cost and price for this sandwich by the quantity for the raw materials that are added to these sandwiches.
- Adding transactions for spoilage products, daily total sales, and anything related to this buffet to help the owner what happened exactly for buffet's cash.
- Making new orders for products in specific buffet to the owner and automatically send notification to him to handle that as soon as possible to cover the products shortage.

Schools Buffets Management System

9/2025

Customer-user Mobile Application

GitLab: <https://gitlab.com/thedarkhawk9177-group/buffetmanagementsystem>

- General customer for any buffet (not as worker) in case the customer (which is usually Mr.) work in more than one school.
- See any buffets with its products with their availability in the inventory for that buffet to make new order in any buffet to the workers in that specific buffet instead of in real to do that and automatically send notification to that buffets workers to prepare to the order as soon as possible.
- Making new complaint about the service or anything for any buffet and automatically send notification to the owner to handle the complaint as soon as possible.

Home Workout System

6/2024

Trainer-admin Application

GitHub: <https://github.com/abd-alrahan/adminfitness>

- Enabling comprehensive control over all application functionalities.
- Adding exercises, diets, tips with all helpful means to trainees and ability to delete them.
- Know the number of users in application.
- Delete redundant users.

Home Workout System

7/2024

Trainee-user Application

GitHub: <https://github.com/abd-alrahan/myfitness>

- Eliminating the need to visit a gym.
- Enabling home workouts.
- Health tracking.
- Follow trainer's tips.

EDUCATION

Completed the fourth year of a Bachelor of Science in Informatics Engineering at Damascus University specialized in Software Engineering.

Progress. **Ends in 2027**

React JS development course in Udemy.

Online, **7/2025**

Flutter & Dart Complete Development in Udemy.

Online, **5/2024**

Introduction to Dart & Flutter Basics at New Horizon Institute for Computer Training.

Syria, Damascus, **1/2024**

TRAINING

Trained in Al-Mounkez Company for over 3 months in web development.

Syria, Damascus, **11/2024**

SKILLS

React JS
OOP principles
Dart, JAVA and C++
English B2 (Upper Intermediate)

Understanding RESTful APIs
Application Development
Problem Solving

State Management
HTML, CSS, JS
Flutter
